*Long Term Home Health Care Program*

### The Long Term patient:

- is chronically ill and requires medical supervision to remain safely at home.
- will receive in-home preventative, diagnostic and supportive services.
- will receive intensive case management, access to community resources and entitlement counseling.

Family Care's Long Term Program provides services that are quality managed, cost effective and culturally sensitive for patients in Nassau and Queens Counties. This program offers an alternative option for the chronically ill patient who would otherwise require placement in a skilled nursing home or health related facility.

### Home Care Services include:

- |                          |                          |
